

Naveen Kumar K

Chittoor, India | 9392546035 | [Gmail](#) | [LinkedIn](#) | [Project Portfolio](#)

Proficient in Data Visualization, Reporting, Dashboarding, Insight analysis with Computer Application background with hands on experience in SQL, Excel, Power BI, Alteryx, Tableau. Honing strong analytical skills, decision-making, problem solving abilities with a learning mindset and proactive approach.

TECHNICAL SKILLS

- | | | | |
|--------------------------|------------------|-----------|----------------------|
| • Power BI Desktop | • Advanced Excel | • Tableau | • Data Modelling |
| • Power BI Service | • SQL | • Alteryx | • Data Visualization |
| • Power Query (M- Query) | • MySQL | • Python | • Data Cleaning |

PROJECTS

Nassau Candy Logistics Intelligence | Python, Streamlit | [Link](#)

- Engineered an end-to-end logistics analytics pipeline using Python and Apache Parquet, resolving artificial temporal data corruption to restore valid shipping lead times for 10,000+ records.
- Built an interactive Streamlit dashboard featuring geographic heatmaps and route leaderboards, optimizing gold-layer aggregations to reduce rendering payload by 99%.
- Diagnosed segment-level routing inefficiencies across 196 factory-to-destination routes, identifying a 46.5% SLA breach rate that was previously masked by aggregate network scores.
- Delivered actionable operational intelligence pinpointing specific multi-factory bottlenecks to facilitate targeted route and lead-time optimization.

Player Behavior & Retention Analysis | Python, RAWG API | [Link](#)

- Analyzed gaming engagement data via the RAWG API using Python, engineering behavioral lifecycle KPIs including Completion, Drop, and Engagement rates.
- Conducted statistical EDA (KDE plots, scatter analysis) to evaluate retention, demonstrating that aggregate ownership volume is a vanity metric with limited predictive value for long-term playability.
- Identified a weak correlation between critical ratings and retention outcomes, revealing that a majority of titles maintain completion rates below 10%.
- Formulated data-driven recommendations to strategically reallocate development investment toward early-game engagement to maximize long-term retention.

NexaFlow SaaS Funnel Analytics | SQL, Power BI | [Link](#)

- Developed a comprehensive SaaS analytics solution evaluating 10,000 user journeys via advanced MySQL funnel queries, cohort analysis, and churn segmentation.
- Designed a 4-page Power BI dashboard utilizing DAX measures and Power Query to monitor the full Signup-to-Retention lifecycle and acquisition channel performance.
- Prioritized monetization yield by identifying a 71.4% activation-to-conversion drop-off and exposing inefficient ad spend that was driving a 66.2% churn rate among paid traffic.
- Pinpointed the critical Day 6–10 conversion window—accounting for ~90% of successful conversions—and mapped targeted lifecycle interventions to improve overall conversion efficiency.

EDUCATION

Bachelor of Computer Applications

08/2022 – 07/2025

Vignana Sudha Degree And P.G. College

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Udemy – The Complete SQL Bootcamp: Go from Zero to Hero
